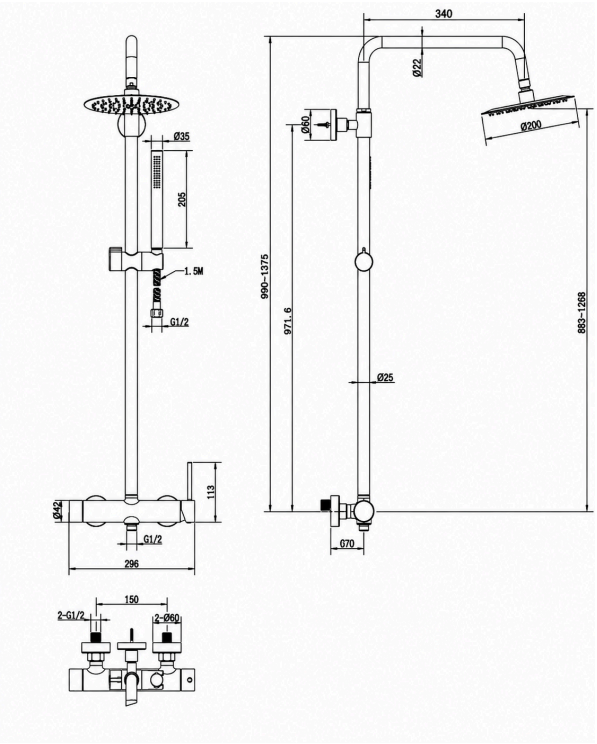
PRODUCT DESCRIPTION

Contemporary wall-mounted shower system designed as a complete coordinated solution for modern bathroom interiors. The system combines a slim exposed shower column, round overhead shower, hand shower and integrated single-lever mixer with diverter in one balanced composition. Its curved upper arm and round shower head introduce a softer visual language than more angular shower systems, while the polished exposed pipework keeps the overall design clean and refined. The included hand shower adds practical flexibility for daily use, and the integrated diverter allows switching between shower functions from the main control. Constructed from stainless steel and brass, the system is designed for wall-mounted installation and is available in several finish options to coordinate with a wide range of contemporary bathroom styles. Its combination of soft curves, minimal detailing and coordinated components makes it suitable for residential, hospitality and premium commercial shower spaces.

DIMENSIONAL DRAWING

MM



All dimensions are shown in millimetres unless otherwise stated. Site conditions, cut-out, trap system and mixer clearance should be verified before installation.
