PRODUCT DESCRIPTION

Adjustable bottle trap designed for under-sink drainage installations. Manufactured from durable SUS304 stainless steel, it combines a compact round trap body with an adjustable vertical inlet and an extended horizontal outlet pipe. The internal water seal helps prevent unpleasant odours from returning through the drainage system, while the removable lower section supports convenient maintenance and cleaning. The warm bronze brushed finish creates a refined appearance suitable for exposed installations beneath contemporary washbasins.

DIMENSIONAL DRAWING

MM

All dimensions are shown in millimetres unless otherwise stated. Site conditions, cut-out, trap system and mixer clearance should be verified before installation.
