Brushed Nickel

SMW-0005

PRODUCT DESCRIPTION

Concealed thermostatic shower mixer designed for a clean, premium wall-mounted installation with two integrated control functions. The exposed trim features a slim rectangular SUS304 face plate with two vertically aligned circular controls, creating a balanced and highly minimalist architectural composition. One control operates the thermostatic mixing function while the second manages water diversion between shower outlets, allowing the functional valve system to remain hidden behind the finished wall surface. The brushed nickel finish gives the product a soft metallic character suited to contemporary bathroom interiors, while the brass mixer body and brass handles provide a robust internal construction. A concealed box is included to support organized in-wall installation and protection of the mixer body during fitting. The overall design is particularly suitable for residential, hospitality and premium commercial shower environments where precise temperature control, visual simplicity and coordinated concealed plumbing are required.

DIMENSIONAL DRAWING
MM

All dimensions are shown in millimetres unless otherwise stated. Site conditions, cut-out, trap system and mixer clearance should be verified before installation.

TECHNICAL DATA
03

Plate height	190 mm
