PRODUCT DESCRIPTION

Contemporary wall-mounted shower system designed as a complete coordinated solution for modern bathroom interiors. The system combines a slim vertical shower column, square overhead shower, hand shower and integrated single-lever mixer with diverter in one clean architectural composition. Its strong linear geometry and restrained detailing create a refined modern appearance, while the square overhead shower reinforces the minimalist design language. The included hand shower provides added flexibility for everyday use, and the diverter allows the user to switch between the shower functions from the integrated control. Constructed from stainless steel and brass, the system is designed for wall-mounted installation and is available in multiple finishes to coordinate with a wide range of contemporary bathroom styles. The overall design is well suited to residential, hospitality and premium commercial shower spaces where visual consistency, practicality and a clean modern aesthetic are required.

DIMENSIONAL DRAWING

MM

All dimensions are shown in millimetres unless otherwise stated. Site conditions, cut-out, trap system and mixer clearance should be verified before installation.
