PRODUCT DESCRIPTION

Contemporary round rain shower head designed for modern bathrooms with a clean, slim and visually balanced profile. The circular spray face creates a soft architectural presence and offers a refined alternative to angular overhead shower designs. Its stainless steel construction gives the product a durable premium character, while the compact central connection keeps the installation neat and understated. The broad round surface is arranged with evenly distributed spray outlets for a consistent rain-shower appearance, and the minimal exposed detailing allows the product to coordinate naturally with contemporary wall-mounted shower arms, concealed mixers and matching bathroom accessories. Finished in Chrome, the shower head is suitable for residential, hospitality and commercial shower environments where a clean modern aesthetic is required.

DIMENSIONAL DRAWING

MM

All dimensions are shown in millimetres unless otherwise stated. Site conditions, cut-out, trap system and mixer clearance should be verified before installation.
